Are rotary screw air compressors oil-free?

Most companies only use oil-free rotary screw air compressors when they absolutely need to, so oil-free air compressors aren't typically found on vehicles. This guide is dedicated to rotary screw air compressors used on vehicles and therefore focuses on oil-injected rotary screws by default.

What is a rotary screw air compressor?

Rotary screw air compressors are a newer, improved type of air compressor. They can be more expensive than traditional reciprocating models but have numerous benefits that make rotary screw air compressors the system of choice for service truck and van fleet managers worldwide.

How much noise does a rotary screw air compressor make?

A typical rotary screw air compressor will operate at 65-75 dBA, or somewhere between the noise level of a car engine and a vacuum cleaner. A rotary screw air compressor will also generate less vibration. Cooler Temperatures: Typical internal operating temperatures for a rotary screw air compressor are 140-160°F.

What is a screw compressor?

Screw compressors are the workhorses of industry and manufacturing. These tough industrial air compressors are widely used for applications requiring high efficiency and continuous airflow, including conveyor systems, manufacturing equipment, process manufacturing, and more.

Are rotary screw air compressors good for mobile air tools?

Air tools require the right CFM and psi to operate efficiently. Rotary screw air compressors tend to produce lower psi than reciprocating air compressors, but this isn't a problem for most mobile air applications. Most air tools run at 80 to 110 psi, which is well within the capabilities of rotary screw air compressors.

How does an oil-free rotary screw air compressor work?

An oil-free (or oil-less) rotary screw air compressor uses a two-stage compression process. Air passes through an intercooler between compression stages to bring temperatures down and prevent overheating. Oil-free rotary screw air compressors eliminate any oil carryover, producing very clean air.
