

How to write a down-the-hole drilling rig rental contract

What should a drilling contract include?

A drilling contract should address the standard of performance expected of the drilling contractor. The API drilling contract form requires the contractor perform "with due diligence and care, in a good workmanlike manner, and in accordance with good drilling practices."

Who is responsible if contractor elects to drill a new hole?

If Contractor elects to drill a new hole, Operator shall be responsible for the cost of moving to and rigging up Contractor's equipment prior to starting the drilling of a new hole at a location designated by Operator. The work of drilling the new hole shall be performed by Contractor under the terms and conditions of this Contract.

How do you pay a contractor for a hole drilled?

Subject to terms and conditions hereof, payment to Contractor at a stipulated price per foot of hole drilled is earned upon attaining such Contract Footage Depth or other specified objective.

Can a drilling contractor disclose drilling information to third parties?

Most drilling contracts contain a provision that upon the written request of the operator, the drilling contractor may not divulge drilling information to third parties. The contractor also promises that its employees will not divulge any drilling information to third parties.

What is a drilling agreement?

Under the agreement, a drilling contractor is permitted to drill in certain areas for a predetermined amount of time for product. In exchange, the owner or lessor of mineral rights receives monetary payment. Among the most important things a drilling agreement does is setting forth the rules surrounding the agreement.

What responsibilities does a contractor have while drilling on a footage basis?

While drilling on a Footage Basis Contractor shall direct, supervise and control drilling operations and assumes certain liabilities to the extent specifically provided for herein.
