

Hysy 982 drilling rig

When will the HYSY 982 rig be delivered?

The contract is expected to begin in the first quarter of 2019. As for the rig, the HYSY 982 semi-submersible rig was built at the Dalian Shipyard in China and can drill in water depths up to 5,000 feet. It was delivered in 2018 and is a sister rig of the COSL Prospector.

What does HYSY 982 stand for?

COSL said on Monday that the contract was awarded to the semi-submersible rig Hai Yang Shi You (HYSY) 982. It is worth noting that this was the first time for COSL to provide drilling services to Eni. COSL added that the exploration operations with the rig would be conducted in the South China Sea.

Where is the HYSY 982 semi-submersible rig located?

As for the rig, the HYSY 982 semi-submersible rig was built at the Dalian Shipyard in China and can drill in water depths up to 5,000 feet. It was delivered in 2018 and is a sister rig of the COSL Prospector. According to Vessels Value, the rig is currently located in the Sea of Okhotsk offshore north Sakhalin.
