

What is a model jack-up rig?

Design and fabrication of a Model Jack-Up Rig The offshore industry has seen the introduction of a new breed of jack-up designs, capable of operating in deep water and harsh environments. In this research, a new design concept of jack-up was introduced. The concept comprises of a chain driven jacking mechanism

How do you set up a jack-up rig?

the setup of a jack-up platform. There are multiple steps in on-site. There are typically two methods for raising a rig's deck. First, pneumatic pistons with movable and fixed pins are used. The cylinders expand and contract while moving up and down the Jack-Up rig's legs. The second mechanism pinion gears.

Are jack-up rigs safe?

ABSTRACT: Since the inception of jack-up rig operations in the early 1950s, series of hazardous accidents has been witnessed, and losses recorded. These events are approximated to occur at least twice in a year. With this statistics, the harsh offshore environment demands jack-ups of premium quality.

What are jack up drilling rules?

Classification rules require that jack up drilling units meet the intact and damage stability criteria outlined in the rules. To meet typical intact stability requirements, jack up units must be capable of withstanding a wind velocity of not less than 36 m/s (70 kn) for field transit and 51.5 m/s (100 kn) in severe storm (ocean tow) conditions.

How does a jack up rig work?

on-site. There are typically two methods for raising a rig's deck. First, pneumatic pistons with movable and fixed pins are used. The cylinders expand and contract while moving up and down the Jack-Up rig's legs. The second mechanism pinion gears. The raising system's jacks are usually sufficient to lift and drop the hull.

Who registers a jack up drilling unit?

Jack up drilling units are normally registered with a Flag State Governmental Administration. The role of the Flag Administration, is to implement statutory requirements of the government for registering the unit.

The rapid proliferation of oil/gas drilling and wind turbine installations with jack-up rig-formed structures increases structural safety requirements, due to the greater risks of operational ...
