

Larger fourth drill rig

Which foundation drilling rig is right for You?

Bay Shore System's LAD Series may be the right solution. Their small foundation drilling rigs have attachment heights down to 6 feet 6 inches. Yet, they can drill down to 70 feet. They also have a wide torque range to handle tough soil. Used Foundation Drilling Rigs Another option is to buy a used foundation drilling rig.

How deep can a Liebherr drilling rig be?

Liebherr offers a wide range of products. The maximum drilling depth extends to over 120 metres. The drill diameter spans from 1.5 to 4.8 metres. Drilling jobsites are becoming more and more demanding. This is exactly what the drilling rigs were designed for: to withstand all environmental impacts.

What's new in Liebherr drilling rigs?

The new generation of Liebherr drilling rigs (LB series): higher torque, a wider range of applications and useful assistance systems for improved operator comfort and increased safety in one elegant design. Deep foundation work has never been so easy. Check out the new features: Liebherr drilling rigs are used worldwide.

How much does a foundation drilling rig cost?

There are some interesting and innovative foundation drilling rig designs. Watson's 4300 has a top-applied Kelly crowd system that eliminates the need for a rotary /bar locking system. Their claim is that wear and tear on the rotary from crowd forces is eliminated and that the rig drills straighter holes. All at a cost of about \$1,200,000.

How does a foundation drilling rig work?

The bit breaks up the rock by rotating and impacting at the same time. The compressed air moves the loosened drill cuttings to the surface. No matter the method, there is a foundation drilling rig available to put those big holes in the ground, in the right place, at the right depth.

Are bay shore rigs a good choice for a small foundation drilling rig?

There are several scenarios where your equipment just won't have a lot of swinging room. Bay Shore System's LAD Series may be the right solution. Their small foundation drilling rigs have attachment heights down to 6 feet 6 inches. Yet, they can drill down to 70 feet. They also have a wide torque range to handle tough soil.
