

Leiv eiriksson semi submersible drilling rig

How did Leiv Eiriksson navigate the Bosphorus Strait?

Photo courtesy Ocean Rig. Ocean Rig's semi-submersible drilling rig Leiv Eiriksson has successfully navigated the Bosphorus Strait using the sophisticated new DPS 4D Differential Positioning System developed by Kongsberg Maritime's specialist position reference and satellite positioning division, Kongsberg Seatex.

Is Transocean retiring the Leiv Eiriksson semi-submersible rig?

The rig owner has also decided to retire the Leiv Eiriksson semi-submersible rig. In a fleet status report published last Friday, Transocean said that, as of 12 February, the company's total backlog was approximately \$7.8 billion.

What does PSA stand for on the Leiv Eiriksson rig?

Norwegian offshore safety body, the Petroleum Safety Authority (PSA), has turned a notice of order to Ocean Rig regarding the working environment and emergency preparedness on the Leiv Eiriksson rig into a formal order.

Does Transocean have a semi-submersible drilling rig?

The semi-submersible drilling rig, built in May 2001, is classified as held for sale. Transocean acquired Leiv Eiriksson, and its sister rig Eirik Raude through the acquisition of rival Ocean Rig in 2018. It then retired the Eirik Raude in early 2019. As for the Leiv Eiriksson, the rig's last gig was a successful one.

What happened to Leiv eiriksson's sister rig?

It is also worth reminding that Transocean also retired Leiv Eiriksson's sister rig, Eirik Raude, back in February 2019 as the rig's reactivation costs were deemed too high. Both rigs were taken over by Transocean through the acquisition of Ocean Rig.
