

## Liberty 274 drilling rig

Where was the BP Liberty rig constructed?

The BP Liberty rig was constructed at Vancouver, British Columbia, Canada using a 400ft long and 105ft wide heavy-lift barge. On completion of assembly, the rig will be 240ft high and will be fitted with eight 2,640hp engines, all powered by natural gas.

Who built the Liberty rig?

Parker Drilling was contracted in 2006 to construct the Liberty rig. Worley Parsons provided the conceptual evaluation, system design, pipeline design, and pipe-in-pipe system configurations. Parker Drilling won an additional contract in 2009 to carry out the rig's operations and maintenance.

What happened to BP's Liberty rig?

In 2018, dismantling work began on the giant rig BP had built for Liberty; the rig wound up never drilling a single well. In 2019, BP announced it was leaving Alaska and selling off its remaining assets - including Liberty - to Hilcorp. That sale was made final in 2020.
