

Load cell drilling rig

We offer weight indicator models designed to work in conjunction with all industry-standard deadline anchors using either tension or compression hydraulic load ...

For use with small drilling and production rigs up to 3,000 lb single line load. System comes with 6" or 8.5" gauge mounted in rugged metal box 25 ft hose ...

Interface load cells are used in many facets of oil and gas, including to ensure safe lifting, enhance equipment integrity, provide accurate ...

Deflection (Clipper) Weight Indicator Systems Crown deflection weight indicators are complete portable weight measurement systems that can be set up near a well operator or mount on a ...

A load cell bracket is located at the rear of the backup which a compression load cell is inserted. Tension Load Cell Eckel also provides tension type backups when operator preferences ...

The Control Drilling deflection style weight indicator is an industry standard. For years it has been the go to hydraulic system for monitoring weight on smaller drilling rigs and service rigs. ...

Understand how hook load sensors monitor weight in drilling, enhancing safety and efficiency through real-time load data and improved operational control.

Engineered to provide years of accurate, reliable measurement of rotary torque on electric rigs, the Forum Electric Rotary Torque System delivers precision ...

Tong Line Pull Gauges Crown's tong torque and tong line pull gauges (CTT100 Series) are designed to indicate make-up or break-out torque for tool joints, ...

Resolution, sensitivity, and increments are user programmable Selectable mV (Load Cell) or mA (4-20mA Current Loop) signal input Field adjustable ...

Hook load monitoring Measurement while drilling (MWD) and measurement while logging (MWL) require a lot of information, including hook load. Service companies usually bring their ...

Oil rigs need a weighing solution that provides durability, precision, and the ability to manage large loads. The Loadcell.ae package ...

National Oilwell Varco is a world leader in providing major mechanical components for offshore land and

Load cell drilling rig

drilling rigs, complete land drilling and well maintenance platforms, tubular inspection ...

OILFIELD INSTRUMENTS 6, 8, 10, and 12 lines strung E551 compression load cell or E543 Sensater tension load cell 16" dial indicator 5.2MPa For deadline loads to 22,500 lb (100 kN) ...

Load cells are also utilised for structural monitoring and safety applications in oil and gas facilities, including offshore platforms, drilling rigs and storage tanks.

Forum's Weight Indicators provide instant and accurate indications of total hook load and net weight on bit to enable faster, more efficient drilling. Call now!

Features Light-weight design is easy to install Specifically designed for Drilling Rig Line Tension applications Integral aluminium load cell with steel saddles ...

The load cell attaches easily to the rig without the need for a deadline anchor, and everything you need to install this system is included. Our indicators are ...

Rig Catheads Most drilling rigs have catheads on each side of the drawworks which are used to apply line pull to the tongs. The catheads do not have built in devices to ...

Load cell drilling rig
