

Logic drilling rig contract

How many standard contracts does logic support?

LOGIC currently supports a suite of 11 Standard Contracts that are available for use throughout the oil and gas industry and these are currently being reviewed and updated. They cover a broad range of operations in the UKCS and are widely used across the contracting community.

What is a rig operator profile?

Operator profiles contain a range of detailed information including contract backlogs, leading edge dayrates, current and future rig timelines and summaries of active operations. New contract signings, new rig requirements, planned and current rig moves, market trends and indicators, drilling contractor earnings and rig schedule updates.

What is the logic standard contracts task finish group?

This LOGIC Standard Contracts Task Finish Group was established in 2012 and reports to the Legal Issues Forum (LIF). The remit of the Work Group is to review, analyse and discuss recommendations on amendments to LOGIC's Standard Contracts and, as and when requested by the LIF, the development of new Standard Contracts.

How do I create a rig requirement?

Create your own rig requirement with over a dozen data selection options or free text entry points, such as preferred rig types, tender dates, programme and requirement descriptions, number of firm wells and expected start date. Save and share your requirements with colleagues.

Who uses riglogix?

The leading source of commercial offshore rig data & intelligence, trusted by leading E&P companies, rig contractors, OFS companies and financial sector advisors worldwide. Why RigLogix? Use the supply and demand scenarios to filter requirements using dates, rig types, locations, categories and private requirements.

How do I filter rig requirements?

Use the supply and demand scenarios to filter requirements using dates, rig types, locations, categories and private requirements. Filter rigs by availability and delivery dates, locations, status, categories, managers and a wealth of design specifications and rig equipment. View and sort using interactive gantt charts and export options.
