

Logic mobile drilling rig contract

Where can I find the logical oil and gas industry standard contracts?

The oil and gas industry standard contracts developed under the CRINE initiative and now administered by LOGIC are now available on-line through the LOGIC website (). Until now, the contracts have only been available in hard copy.

Do you pay the contractor to mobilize the drill rigs?

We pay the contractor to mobilize the drill rigs whether on land, or water (floating) or on water using a stationary platform (typically, a jackup barge). Unless there are extenuating circumstances, we pay the estimated quantity of drill rigs, provided the minimum percent working time requirements of the specifications are met.

How are drill rig samples Paid?

Driven split barrel samples and thin-walled tube samples are paid on an each basis. Rock core of various sizes is paid by the linear foot (meter). We pay the contractor to mobilize the drill rigs whether on land, or water (floating) or on water using a stationary platform (typically, a jackup barge).

How many standard contracts does logic support?

LOGIC currently supports a suite of 11 Standard Contracts that are available for use throughout the oil and gas industry and these are currently being reviewed and updated. They cover a broad range of operations in the UKCS and are widely used across the contracting community.

How do drilling contracts work?

This information is generally provided through the Regional Geotechnical Section. However, there are occasions when additional assistance is necessary. At those times, drilling contracts are let to procure the services of companies experienced in obtaining subsurface information, soil and rock samples, for geotechnical engineering purposes.

What are the requirements for a drilling contract?

GENERAL REQUIREMENTS Typical drilling contracts include a plan and a proposal. The Plan shows the proposed locations of the borings, the utilities in the area of the borings, and special notes that are appropriate to the plan.
