

Longevity screw air compressor repair video

How long can a rotary screw compressor last?

Below are things to avoid that will reduce the lifespan of your rotary screw compressor. Do not stay for more than 3,000 hours without regular maintenance of your compressor. Do not mix old oils with the refill oil because you will be reintroducing contaminants back to your air compressor.

Can You rebuild an air compressor?

We can rebuild most air compressor brands we sell and service. Rebuilds include new gaskets, bearings, O-rings, repair of rotors, and seals, metalizing the shafts, inlet valve rebuild, and end plate repair if needed. We can also service the drive motor, "clean & bake" the windings, and install new seals and bearings on direct-drive units.

Does industrial air power rebuild rotary screw air compressors?

We rebuild your air end and return it to you, like new! Industrial Air Power is your premier resource for air-end rebuilds for all rotary screw air compressors from 10hp up to 1000hp. With thousands of remanufactured air ends completed since 2008, Industrial Air Power offers a reputable, reliable air end rebuilding service with unrivaled prices.

Why does my compressor trip on over temperature?

If your compressor trips on over temperature, it could be any of the following: Ambient temperature too high or not enough ventilation. A screw compressor can run loaded ('pumping air') or unloaded ('idle'). The inlet/loading valve opens and closes according to air demand.

What should I do if my air compressor is too low?

If the capacity of the air compressor is really too low, check the following: Check differential pressure over oil separator. Replace separator when necessary. Check and replace compressed air filters (if installed). Compressor does not unload. Check if pressure switch is correctly set and working.

How long does it take to repair an air end?

We can also service the drive motor, "clean & bake" the windings, and install new seals and bearings on direct-drive units. Depending on the size of the air end and the degree of damage, the entire process of rebuilding an air end normally takes approximately 10 to 14 working days.

If you've invested in an industrial air compressor for your facility, you want to ensure it stays in good working condition for a long time -- ...

Discover the top-rated air screw compressors on the market. Read our in-depth reviews and buyer's guide to find the best fit for your needs and budget.
