

Longhole drill rig

Apart from production drilling, the Simbas are being successfully used for service hole drilling and slot drilling. Slices of the ore are drilled with Simba rigs equipped with fan automation.

Long hole drill rigs are crucial for underground mining operations. These powerful drilling rig machines are designed to drill deep holes in ...

Our drilling rigs offer a variety of feed lengths, positioning configurations, rock drills, and optional automated features for underground production drilling and ...

Production Long-hole Jumbo RAPTOR 7X Long-hole Jumbo Boom style long hole rig for large sections. HC112 Montabert drifter - 30 kW. Hole length up to 35 meter. Drill diameter up to ...

intelligent and operation friendly The Simba 1354 is popular in medium-drift mining for long-hole production drilling applica-tion. The sturdy carrier supports heavy-duty drill tools for the hole ...

Production Master 2.3M is a self-propelled production drill rig designed for drilling long holes in small to medium-size galleries. This underground long-hole ...

Long-Hole Drills For underground production drilling Mine Master offers a range of long hole drilling rigs in configurations suitable for the required work in mines. To adapt to specific ...

Long hole drilling can be used in various mining methods, for example sublevel open stoping, as well as VCR stoping. Furthermore, it may also be utilized in ...

Our advanced underground drilling jumbo products are engineered for precision and efficiency in mining tunnels. Equipped with powerful rock drills, this ...

Longhole This method consists in a variety of chambers where the mine blocks are generally cut by sub-levels from which long holes are drilled in plans that are generally parallel. These ...

Long hole drill rigs are crucial for underground mining operations. These powerful drilling rig machines are designed to drill deep holes in underground mines, and then these ...

DL4 production drilling rig is developed for long hole mining can drill holes with diameter from 64mm to 89mm and maximum 41m deep. The suitable cross-sections (width x height) is from ...

Flexibility, versatility and reliability Maximize productivity in small spaces with the Simba S7. This hydraulic

Longhole drill rig

long-hole drill rig is built for small spaces and tough drilling conditions. Increased ...

Figure 1. Typical in-stope long hole drilling layout for a trackless mining operation! The applicability of long hole drilling in geotechnical areas with varying complexity of geological ...

These features make the LM75 a highly reliable drill when drilling in harsh conditions. The LM75 was designed as a modular drill rig with a number of ...

Deep hole drilling is essential in various industries, including aerospace, automotive, medical, and mold manufacturing. Achieving precise ...

This hydraulic longhole drilling rig is adaptable for a range of mining applications because of its 360-degree boom rotation capability, swing boom mechanism ...

Epiroc's Simba long-hole drilling rigs offer a variety of feed lengths, positioning configurations, rock drills, and optional automated features for underground ...

Sandvik DU412i is a fully automated in-the-hole (ITH) longhole drill fitted with an onboard booster, designed for mining in 3.2 x 3.2 meter or larger production ...

Discover Mine Master's production rigs, engineered for efficient long hole drilling in underground mining. Explore the Production Master series ...

The critical parameters affecting the sustainable implementation of long hole drilling in stoping applications for platinum mines are improved safety and higher production rates compared to ...

Perseverance Drilling are underground drilling specialists, an Australian owned and operated drilling company, contracting to the underground mining industry.

The robust Simba SM60 S is a long-hole production drill rig designed for small to medium-drift mining. The horseshoe-mounted drill unit frame minimizes the transport height, while providing ...

Explore electric longhole drilling with the Sandvik DL422iE rig - a state-of-the-art, electric drill combining efficiency and sustainability for underground mining.

Optimize hard rock mining with the Sandvik DL321 rig - a longhole drill meticulously designed for reliability and efficiency underground.

Longhole drill rig
