

Making a connection on a drilling rig

Making Connections: The Crucial Link in Drilling Operations In the world of drilling and well completion, the term "making a connection" refers to a crucial step in the process of extending ...

I have been asked by new personnel on the rig about making a drill pipe connection using a spinning chain. With our technology in the drilling ...

In oil and gas drilling operations, torque is a crucial factor in ensuring that drill pipes, casings, and other tubular components are securely ...

Varco has developed a system that enables continuous circulation of drilling fluid throughout the drilling process - even while making and ...

To add a length of drillpipe to the drillstring to continue drilling. In what is called jointed pipe drilling, joints of drillpipe, each about 30 ft [9 m] long, are screwed together as the well is drilled.

A top drive is an essential part of the drilling equipment. It is located on a drilling rig (Check also types of drilling rigs) hoisted on a rig mast or a derrick. The top drive is a ...

In this video, we leave our warm Training facility and head out to the field to explain how our HCU's make drilling connections in the work basket.

Roughnecks at work smoothly running a kelly drive drilling rig exploring for oil. They're making a connection or "pipe stab" to continue drilling downward.

Study with Quizlet and memorize flashcards containing terms like What are the four major systems of a rotary drilling rig?, Hoisting System, Rotating system and more.

The paper has not been peer reviewed. Managed-pressure drilling (MPD) is effective for controlling equivalent circulating density (ECD). However, making a drillpipe ...

Roughnecks at work smoothly running a kelly drive drilling rig exploring for oil. They're making a connection or "pipe stab" to continue drilling downward. You can see why this job is high risk ...

Making a connection Act of screwing a section of pipe or rods onto the string suspended in the wellbore. Source: API RP 54, Recommended Practice for Occupational Safety for Oil and Gas ...

Make a connection To attach a joint of drill pipe onto the drill stem suspended in the wellbore to permit

Making a connection on a drilling rig

deepening the wellbore by the length of the joint added (about 30 ft or 9 m). Back to ...

Tripping The Drilling Supervisor will be on the rig floor from start of the trip out of hole until the string is in cased hole. Prior to starting the trip (during circulating bottoms up) check the ...

Surface Tripping Pipe Operations Making pipe Connection When the rig kelly, or top-drive system, has drilled down, it is withdrawn, and a new ...

This video demonstrates how to use a spinning chain to make up connection on the rig. More oilfield information @ Drillingformulas - <https://goo.gl/AMR49...>

A Top Drive System is a piece of equipment in modern drilling operations, replacing the traditional rotary table and kelly drive system. It is ...

Includes procedures for promotion and maintenance of safe working conditions for employees engaged in rotary drilling operations and well servicing ...
