

Mam680 screw air compressor wiring diagram

What is a user manual for the mam6080 screw air compressor controller?

This document provides a user manual for the MAM6080 screw air compressor controller made by Shenzhen Plot Electronic Co., Ltd. It includes instructions on basic operation of the controller interface, descriptions of run, user, factory, calibration, and other parameter settings.

What is mam-880 air compressor controller?

7? Controller protection 1? Motor protection MAM-880 air compressor controller provides all-round protection functions of short-circuit, locking, phase failure, overload, imbalance for motor. Electronic Failure Display Reason failure Short Display failure "HOST/FAN SHORT" Short circuit or rated current is set by mistake...

What does mam6080 controller do?

The text displays GREASE TIME END when running time of the grease is exhausted. PARAMETER. MAM6080 compressor controller provides overload, open phase, unbalance, high voltage, low voltage protection to motor and overload protection to fan. When DISC T is above the STOP DISC T, the controller will alarm and stop the machine.

How to install a MAM controller?

- o Installation of the MAM controller needs to take into consideration heat dissipation and electromagnetic interference.
- o Wiring must be installed according to regulations for high and low currents to reduce electromagnetic interference.
- o Surge arrestors must be used with inductive loads, such as AC contactors, on the output control of relay.

How to install a MAM 860 controller?

- o Installation of MAM 860 controllers should only be performed by a professional technician.
- o Installation of the MAM controller needs to take into consideration heat dissipation and electromagnetic interference.
- o Wiring must be installed according to regulations for high and low currents to reduce electromagnetic interference.

Does mam6080 controller support Modbus RTU protocol?

MAM6080 controller supports MODBUS RTU protocol and can serve as slave when connects with other equipment .It is supports 03?06?16 MODBUS command. Communication baud rate: 9600BPS,1 start bit,8 data bits,1 stop bits and even parity. For MODBUS register address,please see MODBUS communication manual.
