Can a drillmate be used on a flat surface?

The base of the DrillMate is 7.2 inches wide, and the feet are spaced apart to provide stability. A 1.5" pole is likely too narrow for the DrillMate to sit on securely. While the product description mentions it can be used on round or flat edges, it's best suited for wider surfaces. No, you would be able to drill into that.

Does the drillmate 1318 have a hiccup?

The Drillmate 1318 is awesome. However there is one slight hiccup though. The DM-1318 should have an upgraded model that is equipped with a 1/2 chuck instead of a 3/8 chuck. I had to use a 1/2 chuck adapter to attach it to the one on the Drive-Head but unfortunately it leaves very little wiggle-room to attach a drill bit to work on the material.
