

Mine face drilling rigs

Epiroc offers state of the art drilling equipment for underground mining and tunneling. Our comprehensive range of rigs cover all your needs for production drills and face drilling rigs.

Explore the precision and efficiency of the Sandvik DD422iE electric drill rig, a top-notch solution for development drill rigs in mining operations.

Mine Master drill rigs (also known as underground drill rigs, master rigs or face drilling rigs) are primarily utilized in underground mines (hard rock & soft ...

The face drilling rigs are designed for tunnelling and mining applications. With their booms these compact drilling jumbos are capable for various drilling applications, e.g. face drilling, cross-cut ...

Face Drills Mine Master offers a wide range of self-propelled drilling rigs suitable for various heights and width of headings. Plus a range of variant and optional ...

Anirban Sen, Business Line Manager - Underground Division, Epiroc Mining (India), explores the technologies, methods and benefits of modern intelligent face drilling equipment, the ...

Discover Mine Master's advanced range of low-profile drill rigs, roof bolters, and battery-powered machines designed for narrow vein mining ...

This is the first rig of its kind to be able to drill partly on battery power. The automation-ready carrier of the Boomer M20 S is the perfect platform to ...

The Face Master 1.7D drill rig can be equipped with a canopy or closed cabin depending on the customer's requirements. Robust design of the working unit allows for fast and precise drilling ...

Narrow Vein Drill Rigs Narrow vein drill rigs are similar to low profile drill rigs, in that they are designed to venture into and extract ore from confined spaces. ...

As a leading supplier of rock excavation equipment for more than 145 years, we have gained considerable experience and knowledge of mining techniques ...

Epiroc's rugged face drilling rigs are built for blast hole drilling in underground mining and tunneling. Choose your model of jumbo here and read more!

Face Master 1.7 is an underground drilling rig with robust design proven already in many other locations in

Mine face drilling rigs

the world. It is well suited to low profile room-and-pillar operations. The design of ...

Mine Master has launched the testing of a new Face Master 1.7L drilling rig, to tackle the challenge of more demanding working conditions in the underground mines of KGHM ...

Amalgamated Mining and Tunnelling offers a wide selection of jumbo Face Drilling Rigs, ideal for a variety of applications. With automation features available, we design our rigs to withstand ...

KAISHAN provides a full range of drilling rigs designed for different applications in the mining, tunneling, and other infrastructure industries.

The design of this underground drill rig meets the highest safety levels, provides high-performance drilling and comfortable operation. Mine service team can easily carry out daily checking ...

The Boomer S10 face drilling rig is engineered for demanding mining and tunneling applications. Its highly durable design ensures precise positioning, rapid drilling cycles and reliable ...

KJ215 hydraulic tunneling drilling rig is a narrow vein drill rig designed for underground mining and tunneling projects to drill vertical, inclined, and ...

Drilling is the heartbeat of any underground project--and face drill rigs are the tools that keep it going strong. Whether the concise tunneling in the transport industry or the slicing out hard ...

Exploring the many advantages of Face Drill Rigs: Face drill rigs are a kind of underground mining equipment which can make holes safely in rock ...

Boomer M20 - the world s first face drill rig with internal hydraulics With protected hydraulics, sensors and cables, Epiroc's new Boomer M20 is designed and built to minimize unplanned ...

Epiroc's rugged face drilling rigs are built for blast hole drilling in underground mining and tunneling. These jumbo drill rigs can be equipped with up to four booms, covering cross ...

CME drilling rigs are mechanically driven multi-purpose machines with an emphasis on auger drilling. Each machine is custom designed to ...

The percussive diamond inserts also enable rig operators to improve the rig utilisation and reduce downtime as the need to regrind the inserts is eliminated. Robit ...

, Epiroc's rugged face drilling rigs are built for blast hole drilling in underground mining and tunneling. These jumbo drill rigs can be equipped with up to four booms, covering cross ...
