

Mining drill rig controls

Can a remote rig be used for mine drilling?

Mine drilling operations could be performed remotely from a comfortable and safe control room without breaks or interruptions, even when the rig is in a hazardous environment. The solution eliminates exposure to noise, dust and vibration, improving safety for operators and mine personnel.

What is the power system and control of drilling rigs?

The power system and control of drilling rigs in the center of engineering and construction of drilling rigs were 100% localized. The construction of a metal structure (SCR room), SCR units, MCC units and existing transformers are carried out in accordance with international standards at the 1000 square meter electric power.

What is a mine rig access control system?

The system includes an Access Control System at the bench, enabling safe approach for staff accessing the rig or AOZ (Autonomous Operating Zone). Mine drilling operations could be performed remotely from a comfortable and safe control room without breaks or interruptions, even when the rig is in a hazardous environment.

Which drill rigs are agnostic?

FLANDERSTECHNOLOGY is agnostic to any drill rig on the market (diesel or electric), and its open-architecture control system will enable mine sites to modernize mining drills with industry leading automation and machine-health monitoring capabilities into the future. ARDVARC Intelligent Drilling - Collaring.

How to set up a mining rig for Chia Coin?

To set up a mining rig for Chia Coin, you'll need either a GPU (graphics processing unit) or an application-specific integrated circuit (ASIC). The involvement of storage devices is less in mining as compared with farming, as the Proof-of-Work (PoW) algorithm is used to discover new plots.

What is rig control system (RCS 5)?

Epiroc's new Rig Control System (RCS 5) makes full automation easier and more productive than ever before! RCS 5 provides a number of safety and interlock features, as well as a foundation to add new functionality/options later without a major rebuild of the machine.

Powerful RD927L rock drill - 27 kW AutoMine™; for Underground Drilling is a tele-remote system enabling an operator to remotely control and simultaneously supervise a single or multiple ...

AutoMine™; Tele-Remote is Sandvik's entry-level smart teleoperation solution. The system provides an easy way to start exploring the full potential of Sandvik equipment automation ...

Mining drill rig controls

Get reliable grade control drilling solutions from Mincon. Designed for mining exploration with precision sampling using RC and DTH drilling systems.

Improved Safety Safety is essential in mining and construction locations, and blast-hole drill rigs make an important difference to safer ...

TECHNICAL SPECIFICATION Sandvik intelligent drilling jumbo fleet (DD422i, DT922i, DT912D, DT1132i and DT1232i) represents an advanced control system based electro- and diesel ...

Sandvik has released a new Dual Controls package to improve fleet optimization, versatility and performance for its leading Sandvik DD422i and Sandvik DD422iE face drills. The Dual ...

The ability to remotely control drilling rigs reduces operator exposure to dangerous conditions while maintaining consistent drilling ...

Dust Controls on Surface Mine Drilling Operations Robert A. Haney, Supervisory Mining Engineer Everett J. Gerbec, Mining Engineering Technician Link R. Bowers, Mining Engineer Mine ...

The high performance drilling system allows high drilling performance with good drill steel economy and high machine reliability. The operator environment and added automatic ...

CME manufactures drill rigs and drilling equipment for the geotechnical, environmental, mineral exploration and construction industries nationwide.

Enhance your mining development with the DD321 drill rig by Sandvik. It's a development rig designed for efficient underground drilling, ensuring precision.

Intelligent longhole drilling with the Sandvik DL432i rig - a cutting-edge drill delivering precision and advanced technology for underground mining.

The LOWD HMI (Human Machine Interface) Control Station is an integrated graphics display and a push-button control unit that is built into a rugged, ...

Compliant with IEC 60079.0 and IEC 60079.1 this flameproof HMI drill rig control module is designed for world-wide explosive atmosphere regulatory approval ...

In the modern mining industry, the efficiency, safety, and precision of operations are of utmost importance. Remote - control capabilities of mining drill rigs have emerged as a ...

RCS 5 provides the next step for the mining industry from the automation program that brought autonomous drilling into a sustainable reality. Epiroc's new Rig ...

Mining drill rig controls

AutoMine[®]; Control Room package is the second of three levels of autonomous surface drilling feature packages. This package introduces features to make control room operation more ...

AUTOMATED AND ACCURATE DRILLING Focus within the mining industry is increasingly moving towards the logical next step: advancing the use of automation. Sandvik's automation ...

The DU311-TVK is track mounted and equipped with the RH6230 top drive, CF1306-VS (blind bore) feed with split open centralizer, HS130 horizontal single slide-over, ERIS drilling control ...

The DU411 is mounted on a 4-wheel drive frame-steered and diesel-powered carrier. It is equipped with the RH6230 top drive, CF706-F feed with fixed centralizer, PC174 carousel, ...

SCALABLE AUTOMATION With scalable automation packages, Sandvik DD422iE offers a wide range of valuable features for automatic drilling: Booms with hydraulic parallel hold without ...

Epiroc's rugged face drilling rigs are built for blast hole drilling in underground mining and tunneling. Choose your model of jumbo here and read more!

The DU311 is mounted on a 4-wheel drive frame-steered and diesel-powered carrier. It is equipped with the RH6230 top drive, CF706-F feed with fixed centralizer, PA15 single axis ...

Grade Control is an important part to any ore reserve. Drillex International have a fleet of RC Grade Control drill rigs suited to multiple commodities and on the ...

This booklet should be read in conjunction with the MinEx Extractive Industry Safe Drill and Blast in Surface Operations code of practice, the Health and Safety at Work Act 2015; the HSWA ...

The big innovations in surface drilling include key advances in autonomous and remote control technologies and solutions. Both are said to ...

New players are also emerging in surface drills & drilling autonomy. In 2023, China's XCMG said it had successfully tested its XKY270E rotary blasthole rig, which it says is the first remote ...

FLANDERS technology is agnostic to any drill rig on the market (diesel or electric), and its open-architecture control system will enable mine sites to modernize mining drills with industry ...
