

Molikpaq drilling rig

What is Molikpaq drilling & oil production platform?

The Molikpaq drilling and oil production platform is an ice-resistant structure located near Sakhalin Island off the east coast of Russia. A system of 12 seawater supply wells within the sand core supports the production capacity of 90,000 barrels per day (14,000 m³/d) of oil.

What is a Molikpaq rig?

The Molikpaq platform, whose name means "Big Wave" in the language of the Inuits, was originally used as an ice-resistant drilling rig in the Beaufort Sea offshore Canada. In 1998, it was towed to South Korea, where a 15-metre steel 'spacer' was fitted to its base structure to install the platform in the deeper waters offshore Sakhalin Island.

Who owns the Molikpaq drilling rig?

The Molikpaq drilling rig is owned by Sakhalin Energy, which can be contacted for jobs and careers on the Molikpaq. The Drill Barge is a Drill Barge type of rig and is designed as a Arctic Caisson and built by IHI, Japan & Dominion Bridge; Sulzer Canada; International shipyard.

Where is the Molikpaq platform located?

The platform is located 16 km offshore the north-eastern coast of Sakhalin Island, in the Astokh area of the Piltun-Astokhskoye field. The Molikpaq platform, whose name means "Big Wave" in the language of the Inuits, was originally used as an ice-resistant drilling rig in the Beaufort Sea offshore Canada.

Can the Molikpaq be used as a platform for early oil?

In 1995, the Sakhalin II team examined the Molikpaq, considering it as a possible platform for achieving early oil economically. The structure was towed from the Beaufort Sea to Daewoo Heavy Industries, at Okpo yard, in South Korea, due to the matching operating conditions with those in the Sea of Okhotsk.

What is a Molikpaq?

The Molikpaq is an ice-resistant structure built to explore for oil in the Canadian Beaufort Sea. It had been mothballed since 1990 and was later refitted for the Sakhalin Energy Oil and Gas Field Project. It is moored using a single anchor leg mooring (SALM) 2 km away and is accompanied by a floating storage and offloading vessel (FSO).
