

Nabors drilling pace m38 series rigs

What is Nabors Drilling?

Nabors Drilling is a drilling company that is introducing a new series of programmable AC electric (PACE) rigs. The rigs are being built in North America, the Middle East, and in China, and moving into many markets.

What rigs does Nabors use?

Drilling Fleet: Nabors has a diverse fleet of drilling rigs that are designed for different drilling environments and applications. This includes land-based rigs, offshore rigs, and specialty rigs equipped for specific drilling challenges. **Global Presence:** Nabors is a global company with operations in many of the world's major oil and gas regions.

What is a Nabors PACE-M800 rig?

Nabors PACE-M800 rig features innovative advanced technologies that provide both. When drilling laterals at or greater than 7,500 feet, the PACE-M800 rig's racking capacity eliminates the need to lay down drill pipe between wells on the same pad.

How many PACE rigs does Nabors have in total?

In a presentation to analysts, Nabors announced that it had new US drilling commitments for 29 PACE rigs in the 750-1,000-hp range and 18 PACE rigs in the 1,500-2,000-hp range. Additionally, the company saw a high potential for 18 more of the lighter rigs and 19 more of the heavier rigs in 2006.

What is a Nabors MPD-ready rig?

Nabors MPD-Ready rigs feature integrated hardware and software components, and required flow paths, to ascertain the downhole pressure environment limits and manage annular hydraulic pressure during drilling operations. All equipment skids with rig, eliminating non-productive time when moving between wells for multi-well pad drilling.

Where are Nabors drill rigs being manufactured?

Nabors is building its new AC rigs in North America, the Middle East, and China. The PACE 750 and PACE 1000/1500 designs have slightly different specifications, but Nabors is keen to standardize components to improve economies of scale and increase fungibility of components and drill crews.

A Case in Point For instance, one of the first PACE-F rigs deployed in the region has set a new industry standard for drilling efficiency in the Vaca ...

Representing one of the world's youngest and most advanced fleets, Nabors' PACE rigs offer hook load capacities ranging from 750,000 to 1,000,000 pounds, three 2000 ...

Drilling Fleet: Nabors has a diverse fleet of drilling rigs that are designed for different drilling environments

Nabors drilling pace m38 series rigs

and applications. This includes land-based rigs, offshore rigs, and ...

Advanced Walking Capabilities Ideal for large, non-standardized well pads, the PACE[®]-S rigs feature efficient, more advanced walking capabilities for multi-well pad drilling.

B-Series rigs are each equipped with a Columbia Walking System (in photo). The system allows the rig to travel up to 100 ft (30.5 m) without moving the backyard and with full ...

Nabors retrofitted an existing rig - X29 - with RZR (pronounced razor) and has drilled multiple wells for ExxonMobil in the Permian Basin. In 2021, Nabors ...

Nabors Industries owns and operates the world's largest land-based drilling rig fleet and is a leading provider of offshore platform workover and drilling rigs in the U.S. and multiple ...

In the Eagle Ford, a PACE[®]-M rig drilled a record well in the basin, at 32,525 feet, including a 22,500-foot lateral section. In the Bakken, a PACE[®]-X rig followed up drilling an ...

Nabors M-Series PACE rigs are boasting record rig moves. Prior to being introduced into the market more than two years ago, a full move for an M-Series took four or ...

Nabors Industries' Pace-X rig drills for Sage Geosystems in South Texas. (Source: Nabors) Eyeing efficiency, executives at Nabors Industries Ltd. knew years ago that ...

Nabors developed the PACE rig at its Academy Services subsidiary in Calgary, Alberta, Canada. Now the technology behind the rig is being exported worldwide, with fabrication taking place ...

Sonatrach will use Nabors PACE[®]-F rigs, equipped with advanced drilling technologies and equipment such as the Canrig Automated Catwalk, Canrig 500-ton AC Top ...

Rig Series Highlight As part of Nabors SmartRig[®] fleet, the PACE[®]-F automated land rigs are specifically designed to enable quicker rig moves by reducing the number of loads during rig ...

higher ROP and significantly reducing bit wear. Conquer the Unconventional Purpose-built for factory drilling, the PACE[®] class is designed . ability to drive success in repeatable ou. ble of ...

Nabors new PACE[®]-R800 rig utilizes technology optimized for drilling automation with Nabors Rigtelligent[™] control system. The rack and pinion technology enables the precise control of ...

In 2017, Nabors converted its existing PACE[®]-B and PACE[®]-S rigs to a platform equal in capacity and functionality as the newer PACE[®] rigs. Powered by the Rigtelligent[™] operating ...
