

# New ConocoPhillips north slope drill rig

Where is ConocoPhillips oil drilling on Alaska's North Slope?

A ConocoPhillips oil drilling pad on Alaska's North Slope. Lisa Friedman and Erin Schaff traveled to the National Petroleum Reserve in Alaska to examine the controversial Willow project. On the snowy tundra at the northernmost tip of the United States, more than two dozen yellow dump trucks wait on a glistening ice pad.

How many wells has ConocoPhillips drilled?

"Since 2000, ConocoPhillips has drilled more than fifty-eight exploration wells across the entirety of our North Slope operations, highlighting the significant oil exploration and development opportunities that remain on Alaska's North Slope, including in our established areas of development.

What's new at ConocoPhillips?

Games - New! A ConocoPhillips drillsite operator holds first oil from the Doyon 26 rig working in the Fiord West Kuparuk reservoir on Wednesday May 18, 2022. (ConocoPhillips Alaska photo) A rig nicknamed "The Beast" has set a long-distance drilling record in Alaska, and unlocked oil from a new section of the western North Slope oil fields.

What is ConocoPhillips oil drilling?

A ConocoPhillips oil drilling site glowing at dusk, seen from Nuiqsut. Willow will consist of as many as 199 wells spread across three drill sites, which the company believes could produce nearly 600 million barrels of oil over 30 years. That would make it the largest oil project in the United States.

Does ConocoPhillips drill a horizontal well?

ConocoPhillips, Alaska's biggest oil producer, has announced other drilling records in recent years at the Alpine site. The horizontal wells differ from vertical wells extended down into earth. They can travel a more horizontal path across huge distances, reducing the need for tundra-damaging gravel drill pads, pipelines and roads.

Is ConocoPhillips drilling in the National Petroleum Reserve?

ConocoPhillips is the only company that is drilling inside the National Petroleum Reserve-Alaska, 23 million acres set aside in 1923 by the federal government as an emergency oil supply for the Navy. Despite its name, the reserve is an important habitat for migratory birds, caribou and brown bears, among other species.
