Who is responsible for drilling in a non-operated working interest lease?

As you might expect, the owner of the operated working interest is responsible for all aspects of drilling and operations for the lease. The non-operated working interest owner is consulted on decisions related to the lease but are not involved with actually operating any wells.

What is a non-operated working interest?

By definition, a non-operated working interest is just that: an interest owner that is not involved in the day-to-day operational decision making for a given property or project. But that, too, is changing. While operating companies are still the "parents" of exploration and production, many of their non-op partners are like doting uncles.

Are operating and non-operating working interests tax deductible?

Both operating and non-operating working interests generate taxable income. However, the tax structure for each type of interest can vary: Operating Working Interest: Operational costs, including drilling, completion, and operational expenses, are generally deductible, providing tax savings for the owner.

How does non-op ownership of working interests differ from RI and Orri?

Non-Op ownership of Working Interests differs from RI and ORRI in that Non-Op owners assume operating risk to participate in operating profit, whereas RI and ORRI owners have no such opportunity.
