

Ocean apex drilling rig

Where is the ocean apex drilling rig located?

The rig has several drilling assignments lined up in Australia, with the first being a two-well campaign in collaboration with Woodside. Following the successful completion of its SPS at the Seatrium shipyard in Singapore, the Ocean Apex rig was mobilized to Australia.

Is Ocean apex a submersible drilling rig?

Noble Corporation plc NE has announced that its semi-submersible drilling rig Ocean Apex has landed a new contract in Australia. The semi-submersible rig has been hired by an undisclosed client for work offshore Australia. The rig is currently stationed in Australian waters and the new contract should prolong its stay in the region.

Who is Ocean apex?

Offshore drilling contractor Diamond Offshore announced its semisubmersible rig Ocean Apex has commenced a two-well drilling campaign for Woodside Energy in Australia.

How deep is Ocean apex drilling?

The rig's assignment with Chevron is scheduled to end in July 2025. Built in 2014, Ocean Apex has a maximum drilling depth of up to 30,000 feet underwater. The rig can operate in water depths of approximately 6,000 feet and accommodate up to 140 people. NE has recently secured another drilling contract in Suriname with Petronas.

Who owns the ocean apex rig?

The Ocean Apex is currently working for Santos until May 2025 when Chevron takes over until July 2025. Noble inherited the Ocean Apex when it acquired Diamond Offshore; the rig was previously called Ocean Bounty, originally built in 1976. It is an Enhanced Victory design built for operations in water depths up to 6000 feet.

When will the ocean apex semisubmersible rig start drilling in Australia?
