

Ocean voyager drilling rig

What is Ocean Voyager Rogue?

More Information & "Rogue," a former offshore fishing vessel built in 2004, was transformed by Ocean Voyager in 2015 into a luxury exploration catamaran. Featuring a vast deck for submarines and tenders, and emphasizing efficiency and seaworthiness, Rogue offers adventurous luxury for exploring remote destinations with a small crew.

What makes Ocean Voyager unique?

At Ocean Voyager, our ethos is centered around crafting robust, long-range power boats distinguished by their sustainability, efficiency, and functionality. We dedicate ourselves to constructing vessels capable of withstanding the harshest conditions, ensuring systems are easily accessible for straightforward maintenance.

What was the first floating drilling rig to use subsea well control?

The first floating drilling rig to use subsea well control was the Western Explorer (Fig. 3) owned by Chevron, which spudded its first well in 1955 in the Santa Barbara Channel. Others followed quickly, with all of them concerned about the marine environment and technology to allow drilling in rough weather.

What makes Ocean Voyager's Acharn so special?

The yacht Acharn, refitted by Ocean Voyager, exemplifies excellence in marine engineering and design innovation. Originally crafted for superior upwind performance, its transformation into an ultra-light displacement trawler by Ocean Voyager has enhanced its cruising speed, economy, and overall seaworthiness.

What is a self-erecting rig?

To eliminate the costly derrick barge, "self-erecting" modular rigs have been built for light workovers and for drilling to moderate depths. Larger units that have the capability of a 1-million-lbm hook load have been built that are lightweight, easier to rig up/load out, and self-erecting.

Can a platform rig be used as a drilling rig?

Conventional platform rigs are usually loaded out with a derrick barge. Some large platforms may have two drilling units on them. To eliminate the costly derrick barge, "self-erecting" modular rigs have been built for light workovers and for drilling to moderate depths.
