A Blowout Preventer (BOP) Control System as one of the drilling rig components, is a high-pressure hydraulic power unit fitted with directional ...

From dependable, configurable BOP stacks to the BOP control system supporting them, we put safety first, providing you with what's needed to keep your crew ...

Diverter system In Drilling oil and gas Rig is a major equipment in well control. Here, we introduce its applications, procedure & diagrams.

With the increased emphasis on well safety, the offshore oil and gas industry has been working to develop new technologies and business ...

Upon completion of the initial drilling program, a 20,000 psi BOP will be installed on the rig. Following the installation, the Deepwater Atlas will commence the ...

Beijing BOMCO · Introduction Beijing BOMCO Offshore Petroleum Engineering Technology Co., Ltd. (BOMCOBJ), with previous name BOMCO ...

When wind, waves and current drive the rig off centerline the distance between the rig and the top of the BOP stack is increased slightly. This extra riser ...

Running and landing BOP in offshore operations requires from high degree of skills and expertise. Here in this video we can get instructed to have some ...

The offshore sector, following the 2010 Macondo blowout, is under a technical and engineering reform that aims to enhance BOPs based on lessons learned.

The prevention of blowouts during offshore drilling operations is both multifaceted and extremely difficult. As with any drill activity, there are safety ...

Blowout Preventers (BOP) are essential safety devices used on oil rigs to control well pressure and prevent dangerous blowouts. As a critical part ...

In the technically demanding realm of deepwater offshore drilling, Blowout Preventers (BOPs) serve as critical safety mechanisms engineered to ...

Offshore Drilling Rigs Cons Here are the drawbacks of offshore oil drilling. Costly and Potentially

Offshore drilling rig bop

Dangerous: Offshore oil drilling is expensive as ...

In this article, we will explore the importance of BOP in offshore operations, its design and functionality, and the best practices for maintaining and testing BOP systems.

According to a Report to the President by the National Commission on the BP Deepwater Horizon Oil Spill and Offshore Drilling, a central cause of ...

In offshore drilling, safety begins with control--and BOP systems provide exactly that. Whether surface-mounted or subsea, these systems are ...

To prevent uncontrolled flow of fluids during well drilling tasks and damage to the environment or dangers to people, due to exposure to hydrocarbons, several ...

The blowout preventer is a large system of valves each of which is capable of isolating the subsurface of the well from the rig to provide control over the well. ...

The Inside BOP (IBOP) as gray valve is a back-pressure type valve (or float valve) that allows stripping operation using drilling kelly / top ...

A subsea blowout preventer (BOP) is an important safety device that prevents the uncontrolled release of oil and gas from offshore wells. As the ...

The placement of the BOPs at the seabed also significantly increases some of the HSE risks such as gas above the BOP, risks associated with the handling of the riser, and availability of ...

Over the past few years, much of this focus has been on new offshore blowout preventer (BOP) systems and designs, and a number of new ...

Choose from a variety of field-proven designs to fit your desired drilling application. Close on drillpipe or large tubulars without reducing operating ...

The Inside BOP (IBOP) as gray valve is a back-pressure type valve (or float valve) that allows stripping operation using drilling kelly / top drive or running drill pipe into the hole ...

Global Drilling Sites Oil and natural gas drilling is a widespread exercise globally as there are many drilling sites across the United States and ...

The scenario considers drilling operations using a surface BOP in combination with a Subsea Disconnect System (SDS) in Gulf of Mexico (GoM) from a floating production unit with drilling ...
