What are offshore oil rig manufacturers?

Offshore Oil Rig Manufacturers specialise in offshore drilling and rig construction. These rigs drill into the ocean floor to extract oil or gas and have facilities for refining and storing the products until they can be transported to shore. The rigs are constructed in port cities and then towed to their destination.

What is the oil and gas drilling rig industry?

The oil and gas drilling rig industry encompasses a variety of companies dedicated to extracting raw energy resources from beneath the Earth's surface. These entities employ advanced technology and rigorous safety protocols to operate in challenging environments, ranging from offshore deep sea to harsh desert terrains.

Where are drilling rigs made?

Most new onshore rigs, both drilling and work over rigs, are built by OEMs in China. In the US, the larger vertically integrated land drillers have in-house manufacturing operations, so they will outsource some equipment construction, but assemble the new rigs at their own facilities.

How much money does offshore oil rig manufacturing make?

The revenue of offshore oil rig manufacturing is estimated to grow in the next few years. In 2024, the offshore drilling rigs market was valued at \$78.27 billion, and by 2034, it is expected to touch \$166.09 billion.
