What is an offshore drilling rig?

An offshore drilling rig is a massive, self-propelled, semi-submersible rig or drill ship designed to work in water depths that now exceed 10,000 feet. Offshore rigs are expensive investments, costing hundreds of millions of dollars. Close attention is paid to the market supply-demand situation before a new offshore drilling rig is commissioned.

How to choose a rig contractor?

Choosing a rig contractor for drilling a well is an important decision. Close attention is paid to the type of contractor selected and the structure of the contract, as the drilling rig is the largest single cost. All onshore wells are drilled from the surface using a land rig.
