

Oil rig drills into salt mine video

Why did 12 men abandon their oil drilling rig?

Early in the morning on November 20, 1980, twelve men decided to abandon their oil drilling rig on the suspicion that it was beginning to collapse beneath them. They had been probing for oil under the floor of Lake Peigneur when their drill suddenly seized up at about 1,230 feet below the muddy surface, and they were unable to free it.

Did a drill crew Penetrate the salt dome?

Clearly, the salt dome which contained the mine had been penetrated by the drill crew on the lake.

What happened at the bottom of a ruined salt mine?

Trapped air geisered upped hundreds of feet high, some of the swallowed barges floated back up to the surface, but the oil rigs, buildings, salt-filled barges, and other equipment are still at the bottom of a ruined salt mine. The experience gave Richard nightmares for years.

Barges being sucked into the vortex Clearly, the salt dome which contained the mine had been penetrated by the drill crew on the lake. Texaco, ...

The Jefferson Island dome is the location of Lake Peigneur, which grew substantially during a 1980 incident where an underground salt mine, active at ...

The incident began when a Texas oil company was granted permission by Diamond Crystal, the owner of the salt mine, to drill into the lake.

The rig crew had been drilling a test well into deposits alongside a salt dome under Lake Peigneur. By some miscalculation, the assembly drilled ...

In 1980 Texaco was doing exploratory drilling for oil in Lake Peigneur, a shallow man-made lake near New Iberia, LA. Although many of ...

The Lake Peigneur drilling disaster is unbelievable! That catastrophic man-made event drained an entire lake, swallowed up eleven barges, many trees and 65 acres (260,000 m²) of land into a salt mine shaft, creating the biggest waterfall of Louisiana.

The Lake Peigneur disaster occurred when an oil rig drilled through the roof of a salt mine, causing an entire lake to catastrophically drain underground.

Have you ever heard of Louisiana's Vanished Lake? This mysterious body of water, known as Lake Peigneur, disappeared in a single day back in 1980. Imagine a lake ...

Oil rig drills into salt mine video

In petroleum geology, the formation of a salt dome often pushes terrain upward from the surrounding land, while also creating a subterranean salt dome trap, holding petroleum deposits. On Thursday, November 20, 1980, the drill assembly of a Texaco contracted oil rig, just offshore of the salt dome-caused Jefferson Island (itself in the east southeast section of Lake Peigneur), pierced an inactive third level of the Diamond Crystal Salt Company salt mine. The hole produce...
