

Onyx drilling rig

What rig will beach use for ocean Onyx?

Beach will use the Diamond-owned Ocean Onyx rig for the campaign. Under the plan, Beach Energy proposes to drill up to six development wells and abandon three existing subsea wells in Commonwealth waters of the Otway Basin, Australian regulator NOPSEMA said earlier this week.

What is the ocean Onyx?

The Ocean Onyx is a conventionally moored, non-self-propelled, column-stabilised MODU owned and operated by Diamond Offshore. The operational area for the drilling program has been defined as a 2 km radius around the well sites whilst the drill rig is moored on location.

What is the ocean Onyx semi-submersible rig?

The Ocean Onyx semi-submersible rig is currently proposed to undertake this activity. The Ocean Onyx is a conventionally moored, non-self-propelled, column-stabilised MODU owned and operated by Diamond Offshore.

What is the operational area for a drill rig?

The operational area for the drilling program has been defined as a 2 km radius around the well sites whilst the drill rig is moored on location. The 2 km radius encompasses both the outer extent of mooring equipment on the seabed, and the 500 m rig safety exclusion zone (RSEZ).

How much does rig broking cost a day?

Norwegian rig broking company Basso Offshore has estimated the day rate to be around \$220,000. In parallel with signing the contract, Beach Energy and Diamond Offshore have also signed a settlement agreement, which dismisses all current legal proceedings regarding the termination of the previous drilling agreement.
