

Pipe handling system drilling rig

A full range of high-performance pipe handling systems is available for onshore and offshore applications. In addition to double, triple, or quad systems, we ...

The HH Series began in 1993 as simple and regular hydraulic rigs for drilling water wells. It was then modified and improved to meet and surpass the demands of oil and gas drilling with the ...

Drillmec's new pipe handling system allows to build up and rack back stands of drill pipe, drill collars and casing offline, while drilling. All ...

The horizontal tubular handling system (HTHS) is an integrated solution specifically for land drilling operations. The system is designed to horizontally ...

The iRacker's autonomous tubular handling system, offered in electric and hydraulic-powered units, enables completely hands-free pipe handling. ...

TAYMA Automatic Pipe Handling System delivers safe, efficient, and fully automated tubular handling for modern drilling rigs, designed for reliability and productivity in the toughest ...

With its unique gripper head design, the SmartRacker system can handle all types of pipe, including production tubing, drillpipe, casing, and spiral drill collar.

Pipe Handling The purpose of the pipe handling system is mainly to move operators away from risk areas and secondly to guarantee a safer environment by automating repetitive, strenuous ...

Provides automated drilling rigs and services, including their ADR(TM) (Automated Drill Rigs), designed to improve safety and efficiency. ...

It offers real-time onshore monitoring, analysis, and customized reporting of pipe-handling operations--including tripping in, tripping out, and drilling ...

Drilling and work-over rig packages of 250-750 tonnes for cantilever installation form the jack-up rig portfolio. Our packages integrate automated pipe storage systems, either horizontally in ...

Drilling rig pipe automation products are mainly composed of automatic catwalks, drill floor iron drillers, and pipe handling device on monkey board. Automatic ...

Pipe Handling The extensive range of our pipe handling systems delivers industrial drill and collar

Pipe handling system drilling rig

applications, singles to extreme flows, and everything in between. Offshore Handling Systems ...

Applications Onshore drilling rigs How it improves wells The racking board guide arm is an automated pipe handling system that eliminates hazardous, repetitive, and physically ...

Sidekick walkers can be added to pipe and catwalk machines for mobility, especially use with Inquire about engineering feasibility studies for your pipe handling system, room, or rig.

HMH's comprehensive pipe handling equipment portfolio is the key to maximizing uptime and maintaining competitive operational speed. Stand building and ...

Power catwalks from Drillmec are part of the results of the investment in our rig automation program started in the early '90s. We design and produce automatic pipe handling systems or ...

As a leading OEM Drillmec has been designing and building drilling equipment for many years. All our components are designed to mechanize and automate ...

Jereh automated drilling & workover pipe handling system mainly consists of the intelligent pipe handling system, pipe handling manipulators for monkey board ...

The SmartRacker vertical pipe handling system triple and quad column rackers are advanced pipe handling systems for jackup rigs, semisubmersible rigs, ...

Automatic pipe handling system (PHS) is mainly used for offshore drilling platforms (ODP), and is rarely for onshore rig. The three-coordinate automatic PHS has been designed for inland ...

Columbia manufactures a variety of pipe handling equipment, providing a reliable and effective way of moving drill pipe and other handling equipment on and off ...
