The Precision Drilling rig locator map is updated weekly with the Precision Drilling rig locations. Click to [Access Map](#)

Where are precision drilling rigs used?

These rigs are used in both onshore and offshore drilling operations. Geographic Presence: While Precision Drilling is based in Calgary, Alberta, Canada, it operates globally, with a significant focus on the North American market. The company has a presence in key oil and gas regions in Canada, the United States, and internationally.

What is HBR 608-4?

Thanks to a new joints system, the HBR 608-4 is a rapid machine to operate: it features a lighter and robust design to install high-capacity micropiles and perform construction foundation in the most challenging conditions and soil/rock profiles.

What is a micropile rig?

It is one of the most compact and powerful rigs for micropiles, manufactured also with increased power. Designed to be fast and highly efficient, it has a powerful crowd and extraction force; the drilling mast and the rotary head stroke were engineered to be strong and carry out the most difficult jobs.

Which rig is best for jet grouting?

The HBR 608-4 is the most compact and flexible rig for jet grouting and it has been manufactured also with increased power. Designed to be highly efficient, it has a lighter package and a powerful engine; thus it is suited also for difficult drilling conditions in confined and limited areas, which require particularly mobile and powerful equipment.

What is a precision Super single rig?

The Precision Super Single has the lowest load count of our fleet and is a lightning-fast mover. A pad walking Super Single version is available. The walking system utilizes our unique umbilical connection system allowing the rig to move from well to well quickly with virtually no moving equipment.
