

Rigid drill set

How good is the Ridd subcompact drill & impact kit?

The RIDGID SubCompact Drill/Impact Kit was a joy to unbox. The design of the kit is worth praising; the storage bag may not be built for strenuous daily use, but it is perfect for occasional use around the house. The compact charger is portable and can also be wall-mounted along with all of the other chargers I have.

Are Ridd 18V brushless subcompact tools any good?

I ordered the RIDGID 18V Brushless Subcompact Drill/Impact Kit with (2) 2.0 Ah Batteries, Charger, and Tool Bag so I have what I need to get my work done. These subcompact tools are smaller and very easy to hold on too for long periods of time. They are quality built with more power than I expected to do the job.

What makes a good drill & impact driver?

The batteries have a fuel gauge which is convenient when using the tools for an extended time. The size and weight of the drill and impact driver are perfect. The impact driver has a function button where you can change the speed of the tool and go into impact mode. The tools also have a light on them that starts when the trigger is engaged.

How big is a drill & impact?

The drill is about 6 1/8 inches long and about 9 inches tall. The impact is about 5 inches long and about 9 inches tall. They both did a great job for their size and are very easy to carry in the included carry bag. I highly recommend them for the many jobs at home and at work. Seed Program Review (What's this?)
