

Rock commander drill rig pricelist

What is a rock commander rig?

It's a rig that's built to handle the toughest ground conditions and keep performing shift after shift. At Ausdrill, we don't just operate the Rock Commander. We design, build, maintain, and refine these rigs ourselves. That means every drill pad benefits from our decades of in-house expertise and our ongoing commitment to innovation.

How long does a rock commander last?

With an operational lifespan that often exceeds 50,000 hours, the Rock Commander delivers exceptional reliability and value for our clients. It's a rig that's built to handle the toughest ground conditions and keep performing shift after shift. At Ausdrill, we don't just operate the Rock Commander.

What is a rock commander?

Built with operator safety and project efficiency at the core, the Rock Commander combines an ergonomic design with advanced automation to deliver consistent, high-quality results across Australia's toughest mining conditions. Every feature of the Rock Commander is engineered to protect and empower our crews:

What is a rock commander jd-800e-ii?

This version of the Rock Commander shares the larger cab design and tilt console. The JD-800E-II can operate with T45 or T51 drill steel. The hole diameter ranges from 2.75 inches up to 4 inches (70mm to 102mm).

What is a non cab rock commander?

Soosan America's non-cab Rock Commander is the JD-800ENC. The Rock Commander's design delivers Soosan's Keep It Simple Solutions (KISS) engineering. The heart of the JD-800ENC is the time tested and proven YH80A Drifter. The power for JD-800ENC comes from a Cummins powerpack, which provides ample power for the Kawasaki pumps and air compressor.

Which Ausdrill rig is right for You?

The Rock Commander is one of Ausdrill's most trusted and innovative rigs, a proven performer that has reshaped the way we tackle challenging terrains and voids since its launch in 2011.
