How does a drilling rig work?

Drilling in the ground A drilling worker makes up pipes to run the casing into the well with a pneumatic wrench. It is located on the rotary platform of the drilling rig. Rotary Drive Oil Drilling Rig Component, Offshore Rig Part.

What is the difference between impact and rotary drilling rigs?

Rotary drilling rigs drill about 8-10m per day according to normal construction quality requirements and general geological formation conditions. Impact (percussion) drilling rigs, on the other hand, have strong adaptability but are slower than rotary rigs. Rotary rigs cannot cope with harder formations other than strongly weathered formations.
