What is an oil flooded screw compressor?

Oil-flooded screw compressors, also known as oil-injected compressors, utilize oil in the compression process. The oil serves a dual purpose: it acts as a sealant to prevent leakage of air and as a coolant to reduce the temperature of the compressed air and the mechanical parts of the compressor.

Why should you choose a screw air compressor?

Air quality of your compressed air is crucial for the performance of your operation. Our screw air compressors have few moving parts and are designed with everything in one complete cabinet. This ensures a safe work environment, reduces the risk of oil leakage and makes maintenance easy.

What is an air screw compressor?

In the automotive industry, air screw compressors are integral to various operations, from spray painting to tire inflation. The compressors' ability to deliver a steady air supply allows for high precision in paint applications and maintains consistent tire pressure levels.

Why do you need a Sperre screw compressor?

Sperre screw compressors are the natural choice for installations where a large volume of low pressure compressed air is needed. The unique design of the air end secures high efficiency and durability. Thanks to the efficient air end the leakage is reduced. Our screw compressors ensure high output and lower power consumption.

What is a con-X-equipment sc90d air compressor?

Description The Con-X-Equipment-SC90D-Air Compressor is a compact and powerful air screw compressor designed for various applications, from construction to industrial use. Its dual control system allows for both automatic and manual operation, providing flexibility and convenience for users.

What is air screw compressor maintenance?

Some key maintenance tasks include regular oil changes, cleaning or replacing filters, and inspecting all components for wear and tear. In the manufacturing sector, air screw compressors play a significant role in powering pneumatic tools and machinery, facilitating operations such as cutting, shaping, and assembly.
