

Sandvik drill rig operator training

Why should you use Sandvik's digital training tools?

Sandvik's digital training tools offer a practical way to build operator skills in a safe and controlled environment. From loaders to drill rigs, these solutions support hands-on learning through realistic simulations and interactive modules, helping operators gain familiarity with equipment before working on site.

What is a Sandvik instructor-led course?

Sandvik's instructor-led courses provide in-depth, hands-on training guided by experienced professionals. Covering everything from automation systems to equipment operation and maintenance, these sessions are designed to build practical knowledge and confidence--whether on-site, in the classroom, or through virtual delivery.

Who makes Sandvik simulators?

ThoroughTech has been developing advanced operator training simulators for Sandvik mining equipment for more than two decades. From surface drill rigs across to the full breadth of Sandvik's extensive underground equipment portfolio, ThoroughTec now boasts the world's largest and most diverse range of Sandvik simulator models.

What services does Sandvik offer?

At Sandvik, we are committed to helping your team be efficient, safe and productive. We offer digital trainers to help operators become competent with underground drill rigs, trucks and loaders. We also offer instructor-led training for our Automation offering and Cenrevo's suite of digital solutions for rock tools.
