

Sandvik underground drill rigs

This article explores the key features, benefits, and specifications of this advanced drill rig, showcasing why it's an essential asset for modern mining operations.

Very detailed 3d model of Underground Mining Drill Rigs Sandvik Dd422Ie.- detailed enough for close-up renders- two *.max files included Standart materials and v-ray ...

Intelligent longhole drilling with the Sandvik DL432i rig - a cutting-edge drill delivering precision and advanced technology for underground mining.

Sandvik DU311 is a fully mechanized, center-articulated, in-the-hole (ITH) drill designed for high mobility and utility in underground mining. It is a compact yet ...

Sandvik DL421 is a versatile longhole drill rig engineered for large-scale production drilling in underground mines. It is designed for vertical and ...

Elevate your mining efficiency with the DD311 underground drill by Sandvik. This development rig is engineered for reliability and precision in underground drilling.

Elevate your mining efficiency with DD212i underground drill by Sandvik. It features a new design, an intelligent control system, various automated ...

Experience efficient underground drilling with the DD322i drill rig by Sandvik. This advanced drill rig combines technology and performance for optimal mining ...

Explore electric longhole drilling with the Sandvik DL422iE rig - a state-of-the-art, electric drill combining efficiency and sustainability for underground mining.

ZERO EMISSIONS UNDERGROUND DEVELOPMENT Sandvik DD422iE is the mining industry's first highly-automatic development jumbo with an electric driveline system, engineered to meet ...

Sandvik DL311 is a longhole drill rig engineered for small and medium-scale production drilling in underground mines. This versatile rig is designed for vertical and inclined plane rings and fans, ...

Explore high-performance used Sandvik underground drill rigs - reliable, precision-engineered machines built for efficient mining operations. | Sandvik

Sandvik DU411 is a center-articulated, carrier-mounted in-the-hole (ITH) drill that provides highly accurate

Sandvik underground drill rigs

drilling and enhances profitability with the lowest cost ...

Unlock versatility in development drilling with the Sandvik DD210 drill rig. This versatile rig combines reliability and adaptability for various mining needs.

Sandvik DD210L is a low profile single boom electro hydraulic drilling machine designed to work in excavations with headroom as low as 1.7 m. The robust universal boom has a large optimum ...

We engineer an extensive range of underground drill rigs for mining development and production. Available in a variety of feed lengths, boom configurations and size classes, our underground ...

With a complete range of equipment and tools, services and technical solutions, we help the mining and infrastructure industries increase efficiency, cut costs ...

TECHNICAL SPECIFICATION Sandvik DU311 is a highly versatile and compact ITH longhole drill fitted with an onboard booster and designed for underground mining in 4 x 4 m or larger ...

Sandvik DU211-T is a compact track-mounted in-the-hole (ITH) drill rig with a minimum width of 1.2 meters. Designed to carry ITH hammers powered with ...

Explore optimal longhole drilling solutions with the Sandvik DL331 rig, a reliable drill designed for productivity in underground mining operations.

FLEETMINE has an extensive range of Sandvik underground drills and bolters to suit your mine development and production needs. The DD420, DD421, DL430 and DS420 development and ...

TECHNICAL SPECIFICATION The SCX DE151 is the most powerful H size drill rig in the SCX DE100 series range and suitable for both surface and underground applications. This easy to ...

We engineer an extensive range of underground drill rigs for mining development and production. Learn more about our underground drilling rigs.

Sandvik DD312i is an advanced single boom development drill for underground mine development and small scale tunneling. It features a compact carrier and ...

Exploration Drill Rigs Sandvik offers a wide range of exploration drill rigs for surface and underground exploration drilling. The exploration drilling equipment ranges from lightweight ...

Sandvik DU412i is a fully automated in-the-hole (ITH) longhole drill fitted with an onboard booster, designed for mining in 3.2 x 3.2 meter or larger production ...

Sandvik underground drill rigs

As a global leader in underground mining equipment and technology, we deliver a comprehensive offering for underground mining operations, spanning advanced drill rigs, bolters, loaders, ...

Our full selection of mining and surface equipment for rock drilling, crushing and screening, loading, tunneling, quarrying, breaking and demolition.

Sandvik DL321 is a versatile longhole drill rig engineered for small-and medium-scale production drilling in underground mines. It is designed for vertical and ...
