What is a used air compressor?

Used air compressors are machines that increase the pressure of the air by reducing its volume. Large volumes of air are confined in a closed space resulting in higher pressure. A piston within a cylinder compresses the air, creating the pressure. Reciprocating air compressors are available in single or double stage styles, used and new.

What are air compressor products?

Air Compressor products are constructed to achieve maximum productivity, reliability, and peak performance. Compressed air systems are applied to carry all sorts of solids, plastics materials, trash, metal pieces, chips, and trim removal in an industrial manufacturing environment.
