If you are looking to sell your used compressor submit a request online or contact Erik Eichert at 630-238-7480. Air compressors play a crucial role in industrial operations.

What is a rotary screw air compressor?

Rotary screw air compressors (also known as positive displacement screw compressors) are efficient units that use dual rotating screws to compress air, providing a continuous, steady airflow for high-demand applications.

What is a used air compressor?

Used air compressors are machines that increase the pressure of the air by reducing its volume. Large volumes of air are confined in a closed space resulting in higher pressure. A piston within a cylinder compresses the air, creating the pressure. Reciprocating air compressors are available in single or double stage styles, used and new.

How do I purchase an air compressor?

Learn more about our purchasing program online or call our sales office at (800) 876-3736 to get started. Air compressors are a pneumatic tool that converts power into potential energy stored in pressurized or compressed air. When the air tank's pressure reaches its engineered upper limit, the air compressor turns off.

What are air compressor products?

Air Compressor products are constructed to achieve maximum productivity, reliability, and peak performance. Compressed air systems are applied to carry all sorts of solids, plastics materials, trash, metal pieces, chips, and trim removal in an industrial manufacturing environment.
