

Sedco express drilling rig

Who built the Sedco rig?

Two of the drilling platforms, the Sedco Express and the Sedco Energy, were built by DCN in France. PPL Shipyard in Singapore built the third rig, the Cajun Express.

When did Sedco start drilling?

1955- Sedco began operations with two, shallow-water semisubmersible barges in South Texas and built Rig 21, the first "post-type" swamp barge. Global Marine Drilling Company commissioned the CUSS I, the first drillship. This rig pioneered early versions of deepwater drilling methods and technology used by today's offshore drilling fleet.

How does the Sedco 706 semisubmersible rig work?

In order to achieve this, the Sedco 706 semisubmersible rig relies heavily on its Dynamic Positioning (DP) system for automatic station keeping; it previously relied on anchors. As a result of the upgrade, Sedco 706 now features a DP class 2 system provided by Kongsberg Maritime.

Who owns SEDCO drilling?

The Southeastern Drilling Company, Sedco, was an American firm, founded in 1947 by future Texas governor Bill Clements to drill in shallow marsh water. In the 1960s it began to provide drilling services in deeper water. Schlumberger acquired the company in 1984 and a year later combined it with Forex to create Sedco Forex Drilling.

How many rigs does Transocean Sedco have?

Transocean Sedco Forex Inc operates three large, self-propelled, semi-submersible drilling rigs that are each equipped with four 7 MW (9,390 hp) electrically driven Mermaid Pod propulsion units, two on each pontoon. Two of the drilling platforms, the Sedco Express and the Sedco Energy, were built by DCN in France.

Why did Transocean upgrade its Sedco 700 rigs?

FROM THE FULL PICTURE MAGAZINE -- To meet market demands for deepwater drilling, Transocean chose to upgrade two of its Sedco 700 series drilling rigs to dynamically positioned class 2 semi-submersible rigs. The process was so comprehensive the rigs were classified as newbuilds.
