What is a 22 W drill?

The 22-W is a three-line drill with standard components for a modern cable-tool-type. It includes a bull-reel for the drill line, a sand reel for the bailing line, and a casing reel for the hoist line, typically connected to a traveling block or moveable pulley and a hook.

Is a drilling rig a site dependent skill?

It's often stated the art of setting up a drilling rig and the proper site preparation that precedes it are site dependent. No two sites are the same. As the industry offers safety resources that outline basic guidelines for mobilizing, setting up, and demobilizing (see shaded box below), these skills are most learned on site.

How much does a 22W rig weigh?

A 22-W rig produced since the 1960s, which is a Series II version, is rated at 2,500 pounds at the surface for tools on the intermediate stroke. However, its weight on the long stroke is approximately 1,900 pounds.

Is setting up a drilling rig an art?

Many say setting up a drilling rig is an art. Photo courtesy Pure Water Well Drilling Inc. in Lachine, Michigan. "That's typically when problems arise. Not having room to work is a safety issue," he says.

How many strokes does a 22 W drill have?

The 22-W drills have three adjustable strokes: a short 16-inch stroke, an intermediate 26-inch stroke, and a long 35-inch stroke. The 22-W drills have three strokes.
