

Spain complete screw air compressor inspection

Why do you need a screw compressor inspection?

As one of the most widely used air compressor models on the market, screw compressors are in high demand. With tight tolerances, these parts require an inspection solution that delivers both high accuracy and the fastest possible scanning speeds for maximised throughput.

Who conducts inspections & inspections of screw compressors?

1-3-2 The examinations and inspections shall principally be carried out by the staffs of the quality control and assurance of screw compressor manufacture, and may be, if required, witnessed or observed by Purchaser, Client or appointed third-party inspection agent.

How often should a rotary screw compressor be inspected?

Over the years of using the compressor, you will undoubtedly get a better return on your initial investment by inspecting the compressor regularly. As with any motorized machine, a rotary screw compressor that is well-maintained, inspected, and looked after on a strict schedule will generally last a lot longer.

What does observed mean in a screw compressor inspection?

The term observed means that the purchaser requires notification of the timing of the inspection or test. The screw compressor testing or inspection is performed as scheduled, however, if the purchaser or his agent is not present the vendor can proceed to the next step.

What is a compressor shop running test?

The compressor shop running test will be performed by the procedures described herein. The compressor will be tested with the inlet and discharge lines open to the atmosphere, using screw compressor manufacture shop test facilities including a speed-up gear, driver, shaft coupling, lube oil system and silencers etc.

What is a witness in screw compressor testing?

Such witness or observation in Screw Compressor Testing shall, in principle, be effected in a range not opposing or affecting manufacturing processes. The term witnessed means that a hold shall be applied to the production schedule and that the inspection or test will be conducted with the purchaser or his agent in attendance.
