

The rock drill cannot be stepped on

What should I consider before drilling a rock?

You would have to consider a few things before you proceed to the main drilling process one of it is the size of the rock you are drilling. The size would determine the kind of drill you would use, for large rocks where you have to be very flexible enough to move around, a cordless hammer drill is recommended.

How to drill through rock?

Drilling through rock would require a carbide or diamond tipped masonry drill bit. You can install your bit by loosening the chuck of your drill, inserting the end of the bit and then retighten the chuck. You should close the chuck up properly so that the bit is perfectly fitted; it would help avoid accidents during the work process.
