

Tianrui Heavy Industry Screw Air Compressor

PMSM developed by Tianrui Heavy Industry can be widely used in cement, pharmaceutical, metallurgy, electric power, petrochemical, coal, building materials, mining, shipbuilding, port, ...

Compared with the traditional Roots blower, it can save energy by 30% -40% and reduce the noise below 80 decibels. It provides customers with a high-quality solution for equipment ...

More than 200 people from Shandong paper industry association visited Tianrui heavy industry to inspect the magnetic levitation blower 2022-7-22 The first maglev refrigeration compressor in ...

The magnetic levitation chiller independently developed by Tianrui heavy industry adopts the five degree of freedom full active magnetic levitation bearing ...

Maglev air compressor Product introduction Maglev air compressor is a high-tech green environmental protection product developed by Tianrui heavy industry ...

Permanent magnet frequency conversion twin-screw air compressor is widely used in automobile manufacturing, machinery manufacturing, electronic manufacturing, chemical industry, textile, ...

Magnetic levitation low temperature waste heat generator set Permanent Magnet Frequency Conversion Twin Screw Air Compressor HC25 HC28 HC50 HC95 HC109 Holding sleeve ...

Magnetic levitation blower Magnetic levitation turbine vacuum pump Maglev air compressor Magnetic suspension cooling water (heat pump) unit Magnetic levitation low temperature ...

Maglev steam compressor has the advantages of high speed, high efficiency, energy saving and environmental protection. It can replace Roots compressor and multi-stage centrifugal ...

Magnetic levitation blower Magnetic levitation turbine vacuum pump Maglev air compressor Magnetic suspension cooling water (heat pump) unit Magnetic ...

Follow the real-time dynamics of Tianrui, recognize the industry technology application. New technique, new results and new utilizations More > Magnetic ...

Product introduction TR drill pipe can be used in combination with underground and open-air rock drilling rigs, and is mainly used in construction drilling operations such as mine mining, tunnel ...

Tianrui Heavy Industry Screw Air Compressor

Yt29 (s) air leg type rock drill is a heavy-duty air leg type rock drill, which is especially suitable for railway, highway, hydropower and other construction. It is also a replacement product for ...

Yt28 air leg rock drill is a product developed by the company based on the advantages of various air leg rock drills. It adopts advanced rock drill design technology and is an energy-saving rock ...

The maglev blower developed by Tianrui heavy industry is an energy-saving and environmental friendly high-tech product, reaching the international advanced ...

The magnetic levitation chiller independently developed by Tianrui heavy industry adopts the five degree of freedom full active magnetic levitation bearing technology, which realizes the non ...

Product introduction Shandong Tianrui Heavy Industry Co., Ltd. has successfully developed a magnetic levitation generator set by virtue of its independent innovation advantages in the * * ...

The permanent magnet frequency conversion twin screw air compressor developed by Tianrui Heavy Industry is an energy-saving product, which adopts a new generation of permanent ...

maglev air compressor is a high-tech green environmental protection product developed by tianrui heavy industry for energy saving and noise reduction. ...
