

Truck mounted drilling rigs

What is a truck-mounted drill rig?

Truck-mounted drill rigs are a type of mobile drilling equipment affixed to a truck chassis, providing excellent mobility and flexibility for various drilling operations.

What are truck mounted drill rigs used for?

These machines can be used for borehole drilling, mineral exploration, environmental testing, and well digging. Their versatile application spans across numerous projects, reinforcing their indispensability in different operational settings. Geological conditions largely determine the suitability of truck mounted drill rigs.

How to choose the right truck mounted drill rig?

The right truck mounted drill rig should meet these operational requirements efficiently. The capacity of the drill rig is a crucial factor to consider. It should be able to handle the maximum load that is expected during the operations.

How many truck mounted drill rigs does Geotech have?

Geotech operates three truck mounted drill rigs. Suitable for drill programs reachable by road, our truck mounted drill rigs are perfect for efficient mobilizations.

Should you buy a new drill rig?

When an older drill rig fleet is being used, purchasing a new drill rig provides the opportunity to significantly enhance drilling productivity. Newer rigs tend to offer more reliable uptime and come with more built-in safety features compared to older rigs. The maintenance requirements of a truck mounted drill rig should also be considered.

Why should you choose a truck mounted drilling rig?

The main advantage offered by our truck mounted drilling rigs is the quick and effective mobilization and installation, making them perfectly suited for drilling campaigns in challenging environmental conditions, on remote areas and/or rough terrain.
