Who is true drilling?

Established in 1948, True Drilling LLC is a premier, private, family-owned contract drilling company focusing on oil and gas drilling primarily in the Rocky Mountain region. Our drilling fleet consists of tier one state-of-the-art rigs capable of vertical and horizontal wells to depths of 25,000'.

What does it take to operate an oil drilling rig?

CASPER, Wyo. -- Operating an oil drilling rig takes an enormous amount of planning, not only from an engineering standpoint, but a practical one as well. "They come here knowing to bring their groceries for two weeks," said Seth Zupanick regarding the rig's 20 shift workers.

How much power does a drill rig use?

To power the drilling operation, a portable diesel-powered generation plant produces 1,100 kW of electricity to run the 1,500-horsepower drawworks system that's connected by a steel cable to the drilling mechanisms. The roar inside the generating room producing all that power is unbearable, even with hearing protection.

How long does it take to assemble a drilling rig?

The process of assembling a rig once it's on site takes roughly five or so days, he said. In this case, the rig will drill a single well, which takes about 20 days, before it's torn down and moved just a few miles down the road to drill more wells. This rig drills down and horizontally nearly five miles through shale, he said.
