

# Underground rock drill video tutorial

How do you drill through a rock?

To drill through a rock, use a gentle up/down motion as you work the drill bit through the rock, allowing water to circulate under and around the bit until the drill is completely through. Wear safety glasses and a dust mask while drilling. The water keeps the rock and drill bit cool.

What is a rock breaking video?

The video features an introduction to the rock breaking process in mining, followed by a section on how to handle, store and transport explosive products. The third part of the video covers development drilling and blasting practices; and the fourth part discusses production drilling and blasting. Target audience

What is the first step in drilling a well?

The first step in drilling a well is the planning phase. Members of the oil companies, executive staff and senior exploration team meet to review information associated with a prospect and to get an understanding of the scope of work involved.
