

Water well drilling rig transfer information inquiry

Where can I find a map of a water well?

Explore interactive water well maps across the USA with DrillerDB. Access detailed well logs, drilling data, depth information, and geological surveys.

What is a wellsite Information Transfer Specification?

Introduction The WELLSITE INFORMATION TRANSFER SPECIFICATION (WITS) is a communications format used for the transfer of a wide variety of wellsite data from one computer system to another.

What is a well record (well log)?

A well record - also called a well log, water well record, or drilling report - is a detailed document created when your water well was drilled. Licensed contractors file this report with state or local agencies, documenting everything about your well's construction.

Who can drill a well under a permit?

All well operators drilling wells under permits issued by the Division of Mineral Resources must use a drilling contractor that is registered with DEC. A listing of registered drilling contractors and plugging contractors can be obtained from the DMN searchable database.

How do I find data and information on Wells?

Use our search tool to find data and information on wells. Network issues may make the Well Catalog site slow or unavailable at times. We apologize for the inconvenience. Click here for Well Catalog Search Tips including how to find downloadable files. The Well Catalog offers both Map-Based and Text-Based search capabilities.

How does water well map work?

Water Well Map simplifies the process of finding well data with its user-friendly, interactive platform. It provides detailed well information for locations across the U.S. Here's how it works: Open the Water Well Map application and input your property location. The map will display nearby wells, including depth indicators for quick reference.
