The Jotun FPSO is being upgraded at Rosenberg Worley's Stavanger facility. Credit: Energi. The West Phoenix drilling rig is being used to perform the works. Photo: Seadrill.

What do you think about Seadrill's rig selection?

We are very pleased with the rig selection and are happy to have Seadrill on board the team. We look forward to work together for a safe and efficient drilling campaign, says Energi VP Operations, Rune Oldervoll. The contract is subject to authority approval of the revised plan for development and operations for Balder and Ringhorne.

Is West Phoenix drilling a FPSO?

The West Phoenix drillship was engaged for the drilling campaign, which is expected to continue until the third quarter (Q3) of 2023. The project aims to recover an additional 136 million barrels of oil equivalent (Mboe) from the field. The life of the Jotun FPSO is being extended as part of the project.
