What is down-the-hole (DTH) drilling?

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently,and to transition from dirt boring to rock boring just by adding a compressor and hammer to the drill bit.

What is a DTH drill rig?

A down-the-hole drill,usually called DTH Drilling Rig,is basically a mini jackhammer screwed on the bottom of a drill string. The speedy hammer activity breaks hard stone into little flakes and dust and can be dismissed evident by the air exhaust in the DTH hammer.

What is the difference between rotary drilling and DTH drilling?

The lower rotational speed reduces vibrations to the drill head and rig. In relation to pure rotary drilling,DTH drilling is faster,due to the more focused and intensified stresses imposed on the rock,and does not require sophisticated drilling mud preparation,handling and cleaning systems.
