

What are the Russian down-the-hole drilling rig brands

Are drilling rigs made in Russia?

While very few drilling rigs made abroad were supplied to Russia in the early 2000s, starting from 2006, the imported products gradually gained traction with the Russian market. The European and US yards (Bentec, Drillmec, National Oil Well Varco, etc.) were the manufacturers of choice.

How many drill rig suppliers are there?

Their drilling machine cover almost all drilling business, such as blasthole drilling, water well drilling, geothermal drilling and solar piling drilling as well as construction borehole drilling etc. However, along with marketing competition and technology upgrading, less than 10 drill rigs suppliers are leading the drill rig industry developing.

How many drilling rigs can Russia produce a year?

At the moment, the Russian players capable of producing the popular drilling rigs with a hook load capacity of 225-320 t can construct up to 76 drilling rigs per year with 40 of them being made by the Uralmash plant. The drilling and support service market prospects are largely linked to the service market expansion in the entire O&G industry.

How directional drilling has changed in Russia?

Following the 2009 crisis, Russia experienced a robust increase in the meters drilled by the drilling sector. During this time, production from directional drilling was used most extensively. The growth back then reached 26.1% in production drilling and 14.9% in exploration drilling.
